The Workshop

This Workshop is a representation of the typical farm shop. The farmer didn’t have time to go to town to have his horse re-shod. He had to get back to work in the fields as soon as possible. Likewise if he broke a handle on an ax a new one was to be made as soon as possible to finish his tree cutting and clearing the fields. “Make do or do without” is a saying the German Farmer lived by.

This workshop will also be equipped in the future with tools for the Cooper-Smith to use. Many barrels need repair on a farm with a Cider Mill like the Realy’s had.
